Accessibility

8.1 module AccessibilityMBS

8.1.1 module AccessibilityMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** A class to handle all the global stuff of the Accessibility API.

**Notes:**

This class has a lot of CFStringMBS functions to return you constants. Please check Apple’s documentation about those constants.

If you miss a function or a constant, please email.

8.1.2 Methods

8.1.3 ApplicationAXUIElement(pid as Integer) as AXUIElementMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** The AXUIElement for the current application.

8.1.4 Available as Boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** True if the Accessibility API is available.

**Notes:** Should always be true on Mac OS X 10.2.
8.1.5 AXAPIEnabled as boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
True if the user permits Accessibility services.

8.1.6 IsProcessTrusted(Prompt as Boolean = false) as boolean

MBS MacCF Plugin, Plugin Version: 13.4, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Returns whether the current process is a trusted accessibility client.
**Notes:** Added prompt flag for version 18.1.

8.1.7 kAXAllowedValuesAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.8 kAXAMPMFieldAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.9 kAXApplicationActivatedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.

8.1.10 kAXApplicationDeactivatedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.

8.1.11 kAXApplicationDockItemSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.
8.1. MODULE ACCESSIBILITY MBS

8.1.12 kAXApplicationHiddenNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the notification names used for the axobserver class.

8.1.13 kAXApplicationRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.14 kAXApplicationShownNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the notification names used for the axobserver class.

8.1.15 kAXAscendingSortDirectionValue as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** A constant used for the AXUIElement class.

8.1.16 kAXAttributedStringForRangeParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.17 kAXBoundsForRangeParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.18 kAXBROWSERRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.
CHAPTER 8. ACCESSIBILITY

8.1.19 kAXBusyIndicatorRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.20 kAXBottonRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.21 kAXCancelButton as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the action names used for the AXUIElement class.

8.1.22 kAXCancelButtonAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.23 kAXCellForColumnAndRowParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.24 kAXCellRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.25 kAXCheckBoxRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.
8.1. MODULE ACCESSIBILITYMBS

8.1.26 kAXChildrenAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.27 kAXClearButtonAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.28 kAXCloseButtonAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.29 kAXCloseButtonSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.30 kAXColorWellRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.31 kAXColumnCountAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.32 kAXColumnHeaderUIElementsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.
8.1.33  kAXColumnIndexRangeAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.34  kAXColumnRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.35  kAXColumnsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.36  kAXColumnTitleAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.37  kAXColumnTitlesAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.38  kAXComboBoxRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.39  kAXConfirmAction as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the action names used for the AXUIElement class.
8.1. MODULE ACCESSIBILITYMBS

8.1.40 kAXContentListSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.41 kAXContentsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.42 kAXCreatedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification constants.

8.1.43 kAXCriticalValueAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.44 kAXDateFieldRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.45 kAXDayFieldAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.46 kAXDecrementAction as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the action names used for the AXUIElement class.
8.1.47  \texttt{kAXDecrementArrowSubrole} as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. \textbf{Function:} One of the role names used for the AXUIElement class.

8.1.48  \texttt{kAXDecrementButtonAttribute} as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. \textbf{Function:} One of the attribute names used for the AXUIElement class.

8.1.49  \texttt{kAXDecrementPageSubrole} as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. \textbf{Function:} One of the role names used for the AXUIElement class.

8.1.50  \texttt{kAXDefaultButtonAttribute} as CFStringMBS

8.1.51  \texttt{kAXDefinitionListSubrole} as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. \textbf{Function:} One of the role names used for the AXUIElement class.

8.1.52  \texttt{kAXDescendingSortDirectionValue} as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. \textbf{Function:} A constant used for the AXUIElement class.

8.1.53  \texttt{kAXDescription} as CFStringMBS

8.1.54 **kAXDescriptionAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.55 **kAXDialogSubrole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.56 **kAXDisclosedByRowAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.57 **kAXDisclosedRowsAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.58 **kAX disclose Attribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.59 **kAXDisclosureLevelAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.60 **kAX Disclosure Triangle Role as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.
CHAPTER 8. ACCESSIBILITY

8.1.61 kAXDockExtraDockItemSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.62 kAXDockItemRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.63 kAXDocumentAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.64 kAXDocumentDockItemSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.65 kAXDrawerCreatedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the notification constants.

8.1.66 kAXDrawerRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.67 kAXEditedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.
8.1. MODULE ACCESSIBILITY MBS

8.1.68 kAXEnabledAttribute as CFStringMBS
MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.69 kAXExpandedAttribute as CFStringMBS
MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.70 kAXFilenameAttribute as CFStringMBS
MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.71 kAXFloatingWindowSubrole as CFStringMBS
MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.72 kAXFocusedApplicationAttribute as CFStringMBS
MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.73 kAXFocusedAttribute as CFStringMBS
MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.74 kAXFocusedUIElementAttribute as CFStringMBS
MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.
8.1.75 kAXFocusedUIElementChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the notification names used for the axobserver class.

8.1.76 kAXFocusedWindowAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the attribute names used for the AXUIElement class.

8.1.77 kAXFocusedWindowChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the notification names used for the axobserver class.

8.1.78 kAXFolderDockItemSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the role names used for the AXUIElement class.

8.1.79 kAXFrontmostAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the attribute names used for the AXUIElement class.

8.1.80 kAXGridRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the role names used for the AXUIElement class.

8.1.81 kAXGroupRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the role names used for the AXUIElement class.
8.1. MODULE ACCESSIBILITYMBS

8.1.82 kAXGrowAreaAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.83 kAXGrowAreaRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.84 kAXHandleRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.85 kAXHandlesAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.86 kAXHeaderAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.87 kAXHelpAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.88 kAXHelpTagCreatedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification constants.
8.1.89 kAXHelpTagRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.90 kAXHiddenAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.91 kAXHorizontalOrientationValue as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** A constant used for the AXUIElement class.

8.1.92 kAXHorizontalScrollBarAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.93 kAXHorizontalUnitDescriptionAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.94 kAXHorizontalUnitsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.95 kAXHourFieldAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.
8.1.96  kAXImageRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.97  kAXIncrementAction as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the action names used for the AXUIElement class.

8.1.98  kAXIncrementArrowSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.99  kAXIncrementButtonAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.100 kAXIncrementorAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.101  kAXIncrementorRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.102  kAXIncrementPageSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.
8.1.103  kAXIndexAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the attribute constants.

8.1.104  kAXInsertionPointLineNumberAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the attribute constants.

8.1.105  kAXIsApplicationRunningAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the attribute constants.

8.1.106  kAXIsEditableAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the attribute names used for the AXUIElement class.

8.1.107  kAXLabelUIElementsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the attribute constants.

8.1.108  kAXLabelValueAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the attribute constants.

8.1.109  kAXLayoutAreaRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the role names used for the AXUIElement class.
8.1.110 kAXLayoutItemRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.111 kAXLayoutPointForScreenPointParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.112 kAXLayoutSizeForScreenSizeParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.113 kAXLevelIndicatorRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.114 kAXLineForIndexParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.115 kAXLinkedUIElementsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.116 kAXListRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.
8.1.117  kAXMainAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.118  kAXMainWindowAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.119  kAXMainWindowChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.

8.1.120  kAXMarkerTypeAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.121  kAXMarkerTypeDescriptionAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.122  kAXMarkerUIElementsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.123  kAXMatteContentUIElementAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.
8.1. MODULAR ACCESSIBILITY

8.1.124 kAXMatteHoleAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.125 kAXMatteRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.126 kAXMaxValueAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.127 kAXMenuBarAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.128 kAXMenuBarItemRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.129 kAXMenuBarRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.130 kAXMenuButtonRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.
8.1.131 kAXMenuClosedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.

8.1.132 kAXMenuItemCmdCharAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.133 kAXMenuItemCmdGlyphAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.134 kAXMenuItemCmdModifiersAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.135 kAXMenuItemCmdVirtualKeyAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.136 kAXMenuItemMarkCharAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.137 kAXMenuItemPrimaryUIElementAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.
8.1. MODULE ACCESSIBILITY MBS

8.1.138 kAXMenuItemRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.139 kAXMenuItemSelectedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the notification names used for the axobserver class.

8.1.140 kAXMenuOpenedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the notification names used for the axobserver class.

8.1.141 kAXMenuRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.142 kAXMinimizeButtonAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.143 kAXMinimizeButtonSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.144 kAXMinimizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.
CHAPTER 8. ACCESSIBILITY

8.1.145  kAXMinimizedWindowDockItemSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.146  kAXMinuteFieldAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.147  kAXMinValueAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.148  kAXModalAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.149  kAXMonthFieldAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.150  kAXMovedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification constants.

8.1.151  kAXNextContentsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.
8.1.152 kAXNumberOfCharactersAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.153 kAXOrderedByRowAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.154 kAXOrientationAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.155 kAXOutlineRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.156 kAXOutlineRowSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.157 kAXOverflowButtonAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.158 kAXParentAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.
8.1.159  kAXPickAction as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the action names used for the AXUIElement class.

8.1.160  kAXPlaceholderValueAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.161  kAXPopUpButtonRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.162  kAXPositionAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.163  kAXPressAction as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the action names used for the AXUIElement class.

8.1.164  kAXPreviousContentsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.165  kAXProcessSwitcherListSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.
8.1. MODULE ACCESSIBILITYMBS

8.1.166 kAXProgressIndicatorRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.167 kAXProxyAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.168 kAXRadioButtonRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.169 kAXRadioGroupRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.170 kAXRaiseAction as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the action names used for the AXUIElement class.

8.1.171 kAXRangeForIndexParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.172 kAXRangeForLineParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.
8.1.173  kAXRangeForPositionParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.174  kAXRatingIndicatorSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.175  kAXRelevanceIndicatorRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.176  kAXResizedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification constants.

8.1.177  kAXRoleAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.178  kAXRoleDescriptionAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.179  kAXRowCollapsedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the outline notification constants.
8.1. MODULE ACCESSIBILITY MBS

8.1.180  kAXRowCountAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.181  kAXRowCountChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the notification constants.

8.1.182  kAXRowExpandedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the outline notification constants.

8.1.183  kAXRowHeaderUIElementsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.184  kAXRowIndexRangeAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.185  kAXRowRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.186  kAXRowsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.
8.1.187 kAXRTFForRangeParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.188 kAXRulerMarkerRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.189 kAXRulerRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.190 kAXScreenPointForLayoutPointParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.191 kAXScreenSizeForLayoutSizeParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.192 kAXScrollAreaRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.193 kAXScrollBarRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.
8.1.194 kAXSearchButtonAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.195 kAXSearchFieldSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.196 kAXSecondFieldAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.197 kAXSecureTextFieldSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.198 kAXSelectedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.199 kAXSelectedCellsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.200 kAXSelectedCellsChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the cell-based table notification constants.
8.1.201  kAXSelectedChildrenAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.202  kAXSelectedChildrenChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification constants.

8.1.203  kAXSelectedChildrenMovedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the layout area notification constants.

8.1.204  kAXSelectedColumnsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.205  kAXSelectedColumnsChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification constants.

8.1.206  kAXSelectedRowsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.207  kAXSelectedRowsChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification constants.
8.1. MODULE ACCESSIBILITYMBS

8.1.208  kAXSelectedTextAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.209  kAXSelectedTextChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification constants.

8.1.210  kAXSelectedTextRangeAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.211  kAXSelectedTextRangesAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.212  kAXServesAsTitleForUIElementsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.213  kAXSharedCharacterRangeAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.214  kAXSharedTextUIElementsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.
8.1.215  **kAXSheetCreatedNotification as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the notification constants.

8.1.216  **kAXSheetRole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.217  **kAXShowMenuAction as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the action names used for the AXUIElement class.

8.1.218  **kAXShownMenuUIElementAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.219  **kAXSizeAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.220  **kAXSliderRole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.221  **kAXSortButtonSubrole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.
8.1. MODULE ACCESSIBILITYMBS

8.1.222 kAXSortDirectionAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.223 kAXSplitGroupRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.224 kAXSplitterRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.225 kAXSplittersAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.226 kAXStandardWindowSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.227 kAXStaticTextRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.228 kAXStringForRangeParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.
8.1.229 kAXStyleRangeForIndexParameterizedAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.230 kAXSubroleAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.231 kAXSystemDialogSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.232 kAXSystemFloatingWindowSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.233 kAXSystemWideRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.234 kAXTabGroupRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.235 kAXTableRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.
8.1.236  
**kAXTableRowSubrole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.237  
**kAXTabsAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.238  
**kAXTextAreaRole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.239  
**kAXTextAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.240  
**kAXTextFieldRole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.241  
**kAXTimeFieldRole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.242  
**kAXTimelineSubrole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.
8.1.243  kAXTitleAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the attribute names used for the AXUIElement class.

8.1.244  kAXTitleChangedNotification as CFStringMBS

8.1.245  kAXTitleUIElementAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the attribute names used for the AXUIElement class.

8.1.246  kAXToolbarButtonAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the attribute names used for the AXUIElement class.

8.1.247  kAXToolbarButtonSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the role names used for the AXUIElement class.

8.1.248  kAXToolbarRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function: One of the role names used for the AXUIElement class.

8.1.249  kAXTopLevelUIElementAttribute as CFStringMBS

8.1.250  kAXTrashDockItemSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the role names used for the AXUIElement class.

8.1.251  kAXUIElementDestroyedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the notification names used for the axobserver class.

8.1.252  kAXUIElementMBSTypeID as Integer

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. Function:
Returns the TypeID of the AXUIElement class.

8.1.253  kAXUnitDescriptionAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the attribute constants.

8.1.254  kAXUnitsAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the attribute constants.

8.1.255  kAXUnitsChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
One of the layout area notification constants.

8.1.256  kAXUnknownOrientationValue as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. Function:
A constant used for the AXUIElement class.
8.1.257  kAXUnknownRole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.258  kAXUnknownSortDirectionValue as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
A constant used for the AXUIElement class.

8.1.259  kAXUnknownSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.260  kAXURLAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.261  kAXURLDockItemSubrole as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the role names used for the AXUIElement class.

8.1.262  kAXValueAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.263  kAXValueChangedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.
8.1. MODULE ACCESSIBILITY

8.1.264  kAXValueDescriptionAttribute as CFString

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.

8.1.265  kAXValueIncrementAttribute as CFString

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.266  kAXValueIndicatorRole as CFString

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.267  kAXValueWrapsAttribute as CFString

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.268  kAXVerticalOrientationValue as CFString

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** A constant used for the AXUIElement class.

8.1.269  kAXVerticalScrollBarAttribute as CFString

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.270  kAXVerticalUnitDescriptionAttribute as CFString

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants.
8.1.271  **kAXVerticalUnitsAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.272  **kAXVisibleCellsAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.273  **kAXVisibleCharacterRangeAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.274  **kAXVisibleChildrenAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.275  **kAXVisibleColumnsAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.276  **kAXVisibleRowsAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.277  **kAXVisibleTextAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.
8.1. MODULE ACCESSIBILITY MBS

8.1.278  kAXWarningValueAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute constants.

8.1.279  kAXWindowAttribute as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the attribute names used for the AXUIElement class.

8.1.280  kAXWindowCreatedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.

8.1.281  kAXWindowDeminiaturizedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.

8.1.282  kAXWindowMiniaturizedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.

8.1.283  kAXWindowMovedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.

8.1.284  kAXWindowResizedNotification as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
One of the notification names used for the axobserver class.
8.1.285  **kAXWindowRole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.286  **kAXWindowsAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.287  **kAXYearFieldAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 11.1, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute constants. **Notes:** Convenience attribute that yields the year field of a date field element.

8.1.288  **kAXZoomButtonAttribute as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the attribute names used for the AXUIElement class.

8.1.289  **kAXZoomButtonSubrole as CFStringMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:** One of the role names used for the AXUIElement class.

8.1.290  **MakeAXValue(theCFOBJECT as CFOBJECTMBS) as AXValueMBS**

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Creates an AXValue object containing the CFOBJECT. **Notes:** Actually only the RB object around the cfobject handle is replaced. You can’t do this using a cast in RB, so this function was created.
8.1.291 MakeAXValueFromCFRange(location as Integer, length as Integer) as AXValueMBS

MBS MacCF Plugin, Plugin Version: 13.5, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Creates an AXValue object for a CFRange structure with the given values.

**Example:**

```vba
// create with values and read them back
dim a as AXValueMBS = AccessibilityMBS.MakeAXValueFromCFRange(5, 9)

if a.AXIsCFRange then
    dim lo, le as Integer

    if a.AXGetCFRange(lo, le) then
        MsgBox str(lo) + " " + str(le)
    else
        break // error
    end if
else
    break // error
end if
```

8.1.292 MakeAXValueFromCGPoint(x as single, y as single) as AXValueMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Creates an AXValue object for a CGPoint structure with the given values.

8.1.293 MakeAXValueFromCGRect(x as single, y as single, width as single, height as single) as AXValueMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Creates an AXValue object for a CGRect structure with the given values.

8.1.294 MakeAXValueFromCGSize(width as single, height as single) as AXValueMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Creates an AXValue object for a CGSize structure with the given values.
CHAPTER 8. ACCESSIBILITY

8.1.295 MakeProcessTrusted(path as string) as Integer

MBS MacCF Plugin, Plugin Version: 13.4, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Attempts to make the process represented by the specified path a trusted accessibility client. **Notes:**

Use this function to make a process a trusted accessibility client.

Note: The caller must be running as root to successfully call this function. In addition, the caller should relaunch the process after this function returns successfully for the trusted status to take effect.

Path: The path to the executable of the process to make trusted.

Returns an error code that indicates success or failure.

8.1.296 SystemWideAXUIElement as AXUIElementMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns a AXUIElement which covers the whole system. **Example:**

```vbnet
// displays the current window title if accessibility is enabled in Mac OS X 10.2 or newer

dim SystemWideElement, FocusedApplicationElement, FocusedWindowElement as AXUIElementMBS
dim FocusedApplication, FocusedWindow, Title as AXValueMBS
dim s as String
dim cs as CFStringMBS

// show a window so there is one which can be found
window1.show

SystemWideElement = AccessibilityMBS.SystemWideAXUIElement
if SystemWideElement <> nil then
    FocusedApplication = SystemWideElement.AttributeValue(AccessibilityMBS.kAXFocusedApplicationAttribute)
    if FocusedApplication.Type = AccessibilityMBS.kAXUIElementMBSTypeID then
        FocusedApplicationElement = new AXUIElementMBS
        FocusedApplicationElement.Handle = FocusedApplication.Handle
        FocusedApplicationElement.RetainObject

        FocusedWindow = FocusedApplicationElement.AttributeValue(AccessibilityMBS.kAXFocusedWindowAttribute)
        if FocusedWindow <> nil and AccessibilityMBS.kAXUIElementMBSTypeID = FocusedWindow.Type then
            FocusedWindowElement = new AXUIElementMBS
            FocusedWindowElement.Handle = FocusedWindow.Handle
            FocusedWindowElement.RetainObject
```

Title=FocusedWindowElement.AttributeValue(AccessibilityMBS.kAXTitleAttribute)
if Title<>nil and Title.Type=kCFStringMBSTypeID then
   cs=new CFStringMBS
   cs.handle=Title.Handle
   cs.RetainObject
   msgbox cs.str
end if
end if
end if
end if

Notes: In the current implementation you can use this to get the AXUIElement for the frontmost application.

8.1.297 Constants

8.1.298 kAXErrorActionUnsupported = -25206

MBS MacCF Plugin, Plugin Version: 3.3. Function: One of the error values used for the lasterror property.

8.1.299 kAXErrorAPIDisabled = -25211

MBS MacCF Plugin, Plugin Version: 3.3. Function: One of the error values used for the lasterror property.

8.1.300 kAXErrorAttributeUnsupported = -25205

MBS MacCF Plugin, Plugin Version: 3.3. Function: One of the error values used for the lasterror property.

8.1.301 kAXErrorCannotComplete = -25204

MBS MacCF Plugin, Plugin Version: 3.3. Function: One of the error values used for the lasterror property.
8.1.302  kAXErrorFailure = -25200

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.

8.1.303  kAXErrorIllegalArgument = -25201

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.

8.1.304  kAXErrorInvalidUIElement = -25202

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.

8.1.305  kAXErrorInvalidUIElementObserver = -25203

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.

8.1.306  kAXErrorNotEnoughPrecision = -25214

MBS MacCF Plugin, Plugin Version: 13.0. **Function:** One of the error values used for the lasterror property.

8.1.307  kAXErrorNotificationAlreadyRegistered = -25209

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.

8.1.308  kAXErrorNotificationNotRegistered = -25210

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.

8.1.309  kAXErrorNotificationUnsupported = -25207

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.
8.1.310  kAXErrorNotImplemented = -25208

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.

8.1.311  kAXErrorNoValue = -25212

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.

8.1.312  kAXErrorParameterizedAttributeUnsupported = -25213

MBS MacCF Plugin, Plugin Version: 13.0. **Function:** One of the error values used for the lasterror property.

8.1.313  kAXErrorSuccess = 0

MBS MacCF Plugin, Plugin Version: 3.3. **Function:** One of the error values used for the lasterror property.
8.2 class AXObserverMBS

8.2.1 class AXObserverMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
A class to observes notifications sent by the Accessibility services.
**Notes:**
This class requires Mac OS X 10.2 to work.
Subclass of the CFObjectMBS class.

8.2.2 Methods

8.2.3 AddNotification(element as AXUIElementMBS, notification as CFStringMBS) as Integer

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Adds a notification to the observer.
**Notes:** Returns an error code. (0 for no error and -1 if the function is not available)

8.2.4 Create(pid as Integer) as Integer

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Creates a new observer for the given process.
**Notes:** You need a valid process ID to observe the target application. The ProcessMBS class can help you.

8.2.5 RemoveNotification(element as AXUIElementMBS, notification as CFStringMBS) as Integer

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Removes a notification from the observer.
**Notes:** Returns an error code. (0 for no error and -1 if the function is not available)

8.2.6 Events

8.2.7 Action(element as AXUIElementMBS, notification as CFStringMBS)

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: No, Mac: Yes, Win: No, Linux: No. **Function:**
Called whenever an action occurs.
8.3 class AXUIElementMBS

8.3.1 class AXUIElementMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** This class represents an element of the User Interface of an application.

**Example:**

```plaintext
// displays the current window title if accessibility is enabled in Mac OS X 10.2 or newer

dim SystemWideElement, FocusedApplicationElement, FocusedWindowElement as AXUIElementMBS
dim FocusedApplication, FocusedWindow, Title as AXValueMBS
dim s as String
dim cs as CFStringMBS

SystemWideElement = AccessibilityMBS.SystemWideAXUIElement
if SystemWideElement <> nil then
    FocusedApplication = SystemWideElement.AttributeValue(AccessibilityMBS.kAXFocusedApplicationAttribute)
    if FocusedApplication.Type = AccessibilityMBS.kAXUIElementMBSTypeID then
        FocusedApplicationElement = new AXUIElementMBS
        FocusedApplicationElement.Handle = FocusedApplication.Handle
        FocusedApplicationElement.RetainObject
    end if

    FocusedWindow = FocusedApplicationElement.AttributeValue(AccessibilityMBS.kAXFocusedWindowAttribute)
    if FocusedWindow <> nil and AccessibilityMBS.kAXUIElementMBSTypeID = FocusedWindow.Type then
        FocusedWindowElement = new AXUIElementMBS
        FocusedWindowElement.Handle = FocusedWindow.Handle
        FocusedWindowElement.RetainObject

        Title = FocusedWindowElement.AttributeValue(AccessibilityMBS.kAXTitleAttribute)
        if Title <> nil and Title.Type = kCFStringMBSTypeID then
            cs = new CFStringMBS
            cs.handle = Title.Handle
            cs.RetainObject
            msgbox cs.str
        end if
    end if
end if
```

**Notes:**

e.g. a window, a menuitem or a button.
This class requires Mac OS X 10.2 to work.
8.3. CLASS AXUIELEMENTMBS
Subclass of the CFObjectMBS class.

8.3.2 Methods

8.3.3 ActionDescription(action as CFStringMBS) as CFStringMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns the description of the action with the given name. **Notes:** Returns nil on any error.

8.3.4 ActionNames as CFArrayMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** An CF array with all the possible action names. **Notes:** Returns nil on any error.

8.3.5 AttributeNames as CFArrayMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns a CF array with all the possible attribute names.

8.3.6 AttributeValue(attribute as CFStringMBS) as AXValueMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns the value of an attribute.

8.3.7 AttributeValues(attribute as CFStringMBS, minindex as Integer, maxindex as Integer) as CFArrayMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns the values of an attribute as a CF array.
8.3.8 ElementAtPosition(x as single, y as single) as AXUIElementMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Returns the element which is on the given position.
**Notes:** e.g. on a window.

8.3.9 GetAttributeValueCount(attribute as CFStringMBS) as Integer

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Counts how much attributes of the given name exists.

8.3.10 IsAttributeSettable(attribute as CFStringMBS) as Boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Returns true if the attribute with the given name is setable.
**Notes:** Returns false on any error.

8.3.11 PerformAction(action as CFStringMBS)

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Performs a named action.

8.3.12 PostKeyboardEvent(keyChar as Integer, virtualKey as Integer, keydown as boolean)

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**
Posts a keyboard event.
**Example:**

```plaintext
// For example, to produce a 'Z',
// the SHIFT key must be down,
// the 'z' key must go down,
// and then the SHIFT and 'z' key must be released:

dim a as AXUIElementMBS
// get the element

a.PostKeyboardEvent( 0, 56, true ) // shift down
a.PostKeyboardEvent( asc("Z"), 6, true ) // 'z' down
a.PostKeyboardEvent( asc("Z"), 6, false ) // 'z' up
```
8.3. CLASS AXUIELEMENTMBS

a.PostKeyboardEvent( 0, 56, false ) // shift up

Notes:
You can only pass the root or application uielement. The KeyCodesMBS class may help you to find the correct codes.

Synthesize keyboard events. Based on the values entered, the appropriate key down, key up, and flags changed events are generated.
If keyChar is NUL (0), an appropriate value will be guessed at, based on the default keymapping.

All keystrokes needed to generate a character must be entered, including SHIFT, CONTROL, OPTION, and COMMAND keys.

To find the virtual keys, we'll check the RB documentation for the keyboard class.

8.3.13 ProcessID as Integer

Notes: The unix PID.

8.3.14 SetAttributeValue(attribute as CFStringMBS, value as CFObjectMBS)

Notes: Changed type of value to CFObject in plugin version 6.3. Before it was an AXValue.
CHAPTER 8. ACCESSIBILITY

8.4 class AXValueMBS

8.4.1 class AXValueMBS

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**

An AXValue is a CFObject but some extra data types are allowed.

**Notes:**

Every AXValue is a CFObject. In case the CFObject contains unknown data or just binary data it can be a AXValue object.

This class requires Mac OS X 10.2 to work.

Subclass of the CFObjectMBS class.

8.4.2 Methods

8.4.3 AXGetCFRange(byref location as Integer, byref length as Integer) as boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**

Returns the values of a CFRange in case the AXValue holds a CFRange.

**Notes:** Returns true if it's a CFRange.

8.4.4 AXGetCGPoint(byref x as single, byref y as single) as boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**

Returns the values of the CGPoint structure inside the AXValue.

**Notes:** Returns true if successfull.

8.4.5 AXGetCGRect(byref x as single, byref y as single, byref width as single, byref height as single) as boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**

Returns the values of the CGRect inside the AXValue in case there is one.

**Notes:** Returns true if successfull.

8.4.6 AXGetCGSize(byref width as single, byref height as single) as boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:**

Returns the values of the CGSize structure inside the AXValue in case there is one.
8.4. CLASS AXVALUEMBS

Notes: Returns true if successful.

8.4.7 Properties

8.4.8 AXIsCFRange as Boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns true if the AXValue contains a CFRange structure. **Notes:** (Read only property)

8.4.9 AXIsCGPoint as Boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns true if the AXValue contains a CGPoint structure. **Notes:** (Read only property)

8.4.10 AXIsCGRect as Boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns true if the AXValue contains a CGRect structure. **Notes:** (Read only property)

8.4.11 AXIsCGSize as Boolean

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns true if the AXValue contains a CGSize structure. **Notes:** (Read only property)

8.4.12 AXTypeID as Integer

MBS MacCF Plugin, Plugin Version: 3.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns the Type ID of the AXValue. **Notes:** Values:
Types from CoreGraphics:
kAXValueCGPointType = 1,
kAXValueCGSizeType = 2,
kAXValueCGRectType = 3,

Types from CFBase:
kAXValueCFRangeType = 4,

Other:
kAXValueIllegalType = 0

In case this function returns 0 the object may be a normal CFObject.
(Read only property)
Chapter 9

Addressbook

9.1 class ABAccountMBS

9.1.1 class ABAccountMBS

MBS MacCocoa Plugin, Plugin Version: 15.0, Console & Web: Yes, Mac: Yes, Win: No, Linux: No.

Function: The class for an addressbook account.

Example:

dim a as new ABAddressBookMBS
dim accounts() as ABAccountMBS = a.allAccounts

for each c as ABAccountMBS in accounts
MsgBox c.Name + EndOfLine + c.Identifier + EndOfLine + c.BaseURL
next

Notes:

The ABAccount functions are not documented by Apple, but work well on OS X version 10.8 to 10.10. They may work in newer versions if Apple does not change them. They may work in past OS X versions if Apple hat the same features there, too.
If the functions are not available in a OS X version, you will see NSExceptionMBS being raised.
This is an abstract class. You can’t create an instance, but you can get one from various plugin functions.
9.1.2 Methods

9.1.3 Constructor

9.1.4 Properties

9.1.5 BaseURL as String

Notes: (Read only property)

9.1.6 Handle as Integer

Notes: (Read and Write property)

9.1.7 Identifier as String

Notes: (Read only property)

9.1.8 isMainAccount as Boolean

MBS MacCocoa Plugin, Plugin Version: 15.0, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. Function: Whether this account is the main account.
Notes: (Read only property)

9.1.9 Name as String

9.1. CLASS ABACCOUNTMBS

Example:

```vbnet
dim a as new ABAddressBookMBS
dim accounts() as ABAccountMBS = a.allAccounts

dim c as ABAccountMBS = accounts(0)
MsgBox c.Name
```

Notes: (Read only property)
9.2 class ABAddressBookMBS

9.2.1 class ABAddressBookMBS

Notes: All methods in this class will catch exceptions from Cocoa and raise a NSExceptionMBS instead. Using the message, name and reason properties you can see what was the reason for this exception. Please report if you find a method which does not handle exceptions correct.

9.2.2 Methods

9.2.3 ABAddressBookErrorDomain as string

9.2.4 ABMultiValueIdentifiersErrorCode as string

9.2.5 accountWithIdentifier(Identifier as string) as ABAccountMBS

9.2.6 addRecord(record as ABRecordMBS) as boolean

MBS MacCocoa Plugin, Plugin Version: 7.1, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. Function: Adds a record (ABPersonMBS or ABGroup) to the AddressBook Database
Example:

```vbnet
dim a as new ABAddressBookMBS
dim p as new ABPersonMBS
if not p.setValue("Miller", a.kABLastNameProperty) then
    MsgBox "Failed to set field "+a.LocalizedPropertyOrLabel(a.kABLastNameProperty)
end if
```
if not p.setValue("Ben",a.kABFirstNameProperty) then
MsgBox "Failed to set field " + a.LocalizedPropertyOrLabel(a.kABFirstNameProperty)
end if

if a.addRecord(p) then
MsgBox "Record added"
else
MsgBox "Failed to add record"
end if

if a.save then
MsgBox "Changes saved"
else
MsgBox "Failed to save changes"
end if

**Notes:** Returns true if the addition was successful
See also:

- 9.2.7 addRecord(record as ABRecordMBS, Account as ABAccountMBS, byref error as NSErrorMBS) as boolean 2483
- 9.2.8 addRecord(record as ABRecordMBS, byref error as NSErrorMBS) as boolean 2483

### 9.2.7 addRecord(record as ABRecordMBS, Account as ABAccountMBS, byref error as NSErrorMBS) as boolean

MBS MacCocoa Plugin, Plugin Version: 15.0, Console & Web: Yes, Mac: Yes, Win: No, Linux: No.

**Function:** Adds a record (ABPersonMBS or ABGroup) to the AddressBook Database with given account.

**Notes:**
Returns true if the addition was successful.
On Mac OS X 10.7 the error parameter is set to describe the error.
See also:

- 9.2.6 addRecord(record as ABRecordMBS) as boolean 2482
- 9.2.8 addRecord(record as ABRecordMBS, byref error as NSErrorMBS) as boolean 2483

### 9.2.8 addRecord(record as ABRecordMBS, byref error as NSErrorMBS) as boolean

**Function:** Adds a record (ABPersonMBS or ABGroup) to the AddressBook Database.
CHAPTER 9. ADDRESSBOOK

Notes:
Returns true if the addition was successful.
On Mac OS X 10.7 the error parameter is set to describe the error.
See also:

- 9.2.6 addRecord(record as ABRecordMBS) as boolean 2482
- 9.2.7 addRecord(record as ABRecordMBS, Account as ABAccountMBS, byref error as NSErrorMBS) as boolean 2483

9.2.9 addressBook as ABAAddressBookMBS

Notes:
If you’re just making one-off lookups and edits, the sharedAddressBook method is probably more appropriate.
If the user denies your application access to the Address Book database, this method returns nil.

Available in OS X v10.5 and later.
You need to use this method if you want to get an addressbook for ABPersonViewMBS.

9.2.10 allAccounts as ABAccountMBS()

MBS MacCocoa Plugin, Plugin Version: 15.0, Console & Web: Yes, Mac: Yes, Win: No, Linux: No.
Function: Queries list of all accounts.
Example:

dim a as new ABAAddressBookMBS
dim accounts() as ABAccountMBS = a.allAccounts
Break // look in debugger

9.2.11 Constructor

9.2. **CLASS ABADDRESSBOOKMBS**

9.2.12 **enabledAccounts as ABAccountMBS()**

MBS MacCocoa Plugin, Plugin Version: 15.0, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Queries list of enabled accounts.  

**Example:**

```plaintext
dim a as new ABAddressBookMBS
dim accounts() as ABAccountMBS = a.enabledAccounts
Break // look in debugger
```

9.2.13 **EnableEvent**

MBS MacCocoa Plugin, Plugin Version: 12.0, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Activates the events in this class.  

**Notes:** You only need to call this if you use AddHandler command in Real Studio to add event handlers. The plugin automatically does that in the constructor, but that is too early for AddHandler. And plugin on enables events if you use them.

9.2.14 **formattedAddressFromDictionary(address as Dictionary) as NSAttributedStringMBS**

MBS MacCocoa Plugin, Plugin Version: 7.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Returns an attributed string containing the formatted address.  

**Notes:**

The string’s attributes match address dictionary keys (kABAddressStreetKey for example). Each attribute value contains the localized description of the key. (For example, the value of a Canadian kABAddressZIPKey field would be Postal Code)

9.2.15 **GotSharedAddressbook as boolean**

MBS MacCocoa Plugin, Plugin Version: 12.3, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Whether some other part of your app queried the shared addressbook already.  

**Notes:**

sharedAddressbook asks for permissions the first time you call it. So with this function you can check if some other application part already queried the sharedAddressbook function. If true, a call to sharedAddressbook should return quickly. Either with nil (no permissions) or the addressbook.
9.2.16 groupForName(name as string) as ABGroupMBS

**Function:** Searches the group with the given name.
**Example:**
```vba
dim a as new ABAddressBookMBS
dim name as string = "Some Group"
dim g as ABGroupMBS = a.groupForName(name)
MsgBox g.DisplayName + " : " + str(g.members.Ubound + 1)
```

9.2.17 groupForUniqueId(uniqueid as string) as ABGroupMBS

**Function:** Returns a ABGroupMBS matching a given unique ID.
**Example:**
```vba
dim a as new ABAddressBookMBS

// you have some uid
dim groups() as ABGroupMBS = a.groups
dim uid as string = groups(0).valueForProperty(a.kABUIDProperty)

// later you want to find the group
dim g as ABGroupMBS = a.groupForUniqueId(uid)

// shows the name
MsgBox g.valueForProperty(a.kABGroupNameProperty)
```

**Notes:**
Returns nil if the record could not be found or matches to a person.
Available in Mac OS X 10.3 or newer.
see also recordForUniqueId.
See also:
- 9.2.18 groupForUniqueId(uniqueid as string, account as ABAccountMBS) as ABGroupMBS

9.2.18 groupForUniqueId(uniqueid as string, account as ABAccountMBS) as ABGroupMBS

MBS MacCocoa Plugin, Plugin Version: 15.0, Console & Web: Yes, Mac: Yes, Win: No, Linux: No.
**Function:** Finds a group for given unique ID for given account.
9.2. **CLASS ABADDRESSBOOKMBS**

See also:

- 9.2.17 `groupForUniqueId(uniqueid as string) as ABGroupMBS`  

9.2.19 **groups as ABGroupMBS()**

**Function:** Returns an array of all the groups in the AddressBook database

**Example:**

```vba
' list all email addresses in one group
Dim book as ABAddressBookMBS
dim groups() as ABGroupMBS
dim person as ABPersonMBS
dim data as ABMultiValueMBS
dim s as string

book=new ABAddressBookMBS
groups=book.groups

for each group as ABGroupMBS in groups
    If group.valueForProperty(book.kABGroupNameProperty)= "test" then // or any valid group
        dim members() as ABPersonMBS = group.members

        for each member as ABPersonMBS in members
            data=person.valueForProperty(book.kABEmailProperty)
            if data<>nil then
                for k as Integer=data.count-1 downto 0
                    s=s+data.valueAtIndex(k)+EndOfLine
                next
            end if
        next
    end if
next
```

**Notes:**

Returns an empty array in case the DB doesn’t contain any groups.

Returns nil on any error.
9.2.20  groupsForAccount (account as ABAccountMBS) as ABGroupMBS()

MBS MacCocoa Plugin, Plugin Version: 15.0, Console & Web: Yes, Mac: Yes, Win: No, Linux: No.
Function: Returns an array of all the groups for this account.
Example:

    dim a as new ABAddressBookMBS
    dim c as ABAccountMBS = a.defaultAccount
    dim groups() as ABGroupMBS = a.groupsForAccount(c)

Break // look in debugger

Notes: Returns an empty array in case the DB doesn’t contain any body.

9.2.21  kABAddressCityKey as string

Function: One of the dictionary keys for the address.

9.2.22  kABAddressCountryCodeKey as string

Notes:

kABAddressCountryCodeKey code must be one of the following:
iso country codes

    ae = United Arab Emirates
    ar = Argentina
    at = Austria
    au = Australia
    ba = Bosnia and Herzegovina
    be = Belgium
    bg = Bulgaria
    bh = Bahrain
    br = Brazil
    ca = Canada
    ch = Switzerland
    cn = China
    cs = Czech
    de = Germany

9.2.23 kABAddressCountryKey as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** One of the dictionary keys for the address. **Notes:**

kABAddressCountryCodeKey code must be one of the following: iso country codes

9.2.24 kABAddressHomeLabel as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** A label for the home address.

9.2.25 kABAddressProperty as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Street Addresses - kABMultiDictionaryProperty **Notes:** This property is used for persons only.

9.2.26 kABAddressStateKey as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** One of the dictionary keys for the address.

9.2.27 kABAddressStreetKey as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** One of the dictionary keys for the address.

9.2.28 kABAddressWorkLabel as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** A label for the work address.
9.2. CLASS ABADDRESSBOOKMBS

9.2.29 kABAddressZIPKey as string

9.2.30 kABAIMHomeLabel as string

9.2.31 kABAIMInstantProperty as string

Notes:
This property is used for persons only.
Deprecated in Mac OS 10.7. You should use kABInstantMessageProperty.

9.2.32 kABAIMMobileMeLabel as string

Notes:
Available on Mac OS X 10.7 or later.
none

9.2.33 kABAIMWorkLabel as string

9.2.34 kABAAlternateBirthdayComponentsProperty as string

9.2.35 kABAnniversaryLabel as string

9.2.36 kABAssistantLabel as string

9.2.37 kABBirthdayComponentsProperty as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. Function: One of the property names for the addressbook records. Notes: Available on Mac OS X 10.7 or later. Birth date - kABDateComponentsProperty

9.2.38 kABBirthdayProperty as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. Function: Birth date - kABDateProperty Notes: This property is used for persons only.

9.2.39 kABBrotherLabel as string

9.2.40 kABCalendarURIsProperty as string

9.2. CLASS ABADDRESSBOOKMBS

9.2.41 kABChildLabel as string

9.2.42 kABCreationDateProperty as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. Function: Creation Date (when first saved) - kABDateProperty
Notes: A property for all records.

9.2.43 kABDatabaseChangedExternallyNotification as string

Notes:
Posted when a process other than the current one has changed the Address Book database. Depending on the operation performed on the address book, one or more of the following keys may be included in the user-info dictionary: kABInsertedRecords, kABUpdatedRecords, and kABDeletedRecords. The values for each of the keys are the unique IDs of the records that were inserted, updated, or deleted, respectively. If the values for all the keys are nil, every record has changes. For example, this happens when the Address Book database is restored from a backup copy.

The plugin implements this notification for you and calls the DatabaseChanged event in ABAddressBookMBS class.

9.2.44 kABDatabaseChangedNotification as string

Notes:
Posted when this process has changed the Address Book database. Depending on the operation performed on the address book, one or more of the following keys may be included in the user-info dictionary: kABInsertedRecords, kABUpdatedRecords, and kABDeletedRecords. The values for each of the keys are the unique IDs of the records that were inserted, updated, or deleted, respectively. If the values for all the keys are nil, every record has changes. For example, this happens when the Address Book database is restored from a backup copy.

The plugin implements this notification for you and calls the DatabaseChanged event in ABAddressBookMBS class.
9.2.45  kABDeletedRecords as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** One of the keys contained by the user-info dictionary of the notifications posted by the Address Book framework.  
**Notes:** Records that have been deleted.

9.2.46  kABDepartmentProperty as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Department name - (Person)  
**Notes:** This property is used for persons only.

9.2.47  kABEmailHomeLabel as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** A label for the home email address.

9.2.48  kABEmailMobileMeLabel as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** One of the labels for emails.  
**Notes:**  
Available on Mac OS X 10.7 or later.  
MobileMe email

9.2.49  kABEmailProperty as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** Email(s) - kABMultiStringProperty  
**Notes:** This property is used for persons only.
9.2. **CLASS ABADDRESSBOOKMBS**

### 9.2.50 kABEmailWorkLabel as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** A label for the work email address.

### 9.2.51 kABFatherLabel as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** One of the labels for the related names.

### 9.2.52 kABFirstNamePhoneticProperty as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** First name Phonetic - kABStringProperty  
**Notes:** This property is used for persons only.

### 9.2.53 kABFirstNameProperty as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** First name - kABStringProperty  
**Example:**
```vba
dim a as new ABAddressBookMBS
dim p as new ABPersonMBS

if not p.setValue("Ben",a.kABFirstNameProperty) then MsgBox "Failed to set field " + a.LocalizedPropertyOrLabel(a.kABFirstNameProperty)
end if
```

**Notes:** This property is used for persons only.

### 9.2.54 kABFriendLabel as string

MBS MacCocoa Plugin, Plugin Version: 11.2, Console & Web: Yes, Mac: Yes, Win: No, Linux: No. **Function:** One of the labels for the related names.
9.2.55  kABGroupNameProperty as string

**Function:** Name of the group - kABStringProperty  
**Example:**

```pascal
dim theAB as new ABAddressBookMBS
dim result as new ABGroupMBS
dim error as NSErrorMBS
